PRAVIN CHATURVEDI

AI PRODUCT MANAGER | PRODUCT STRATEGY, ROADMAPS & AI PRODUCTS | 0-TO-1 PRODUCT BUILDER

+91 99206 82384 | pravinchaturvedi89@gmail.com | Mumbai, India | LinkedIn

PROFESSIONAL SUMMARY

Product Manager / AI Product Manager

Product Manager with 4+ years of product ownership and 12 years across consumer technology, platform delivery, AI-enabled products, and engineering. Experienced in product discovery, requirements, PRDs, roadmaps, prioritization, stakeholder management, Agile delivery and AI-enabled product development. Combines product thinking with strong engineering depth to translate business and customer problems into practical, measurable and scalable solutions. Hands-on experience building internal AI-powered products and workflows using Claude and GitHub Copilot, focused on automation, quality, reporting and release efficiency.

CORE EXPERTISE

Product Strategy & Roadmaps Discovery, PRDs, prioritization & Agile delivery	**Product Ownership & Stakeholders** Requirements, alignment & cross-functional execution	**AI Product Development** GenAI, AI agents, analytics & technical trade-offs

PROFESSIONAL EXPERIENCE

Marsh McLennan Services India Pvt Ltd — **Present**
Risk & Insurance Domain
AI Product Manager

- Own product and delivery initiatives across requirements discovery, prioritization, solution definition, release readiness and post-release improvement for risk and insurance applications.
- Partner with business stakeholders, Product, Engineering, DevOps and Agile squads to translate customer and business needs into requirements, user stories and delivery priorities.
- Drive AI-enabled product opportunities across QA and delivery workflows, including AI-powered test documentation, defect summaries, QA status and release reporting.
- Define success measures using quality, delivery, automation and release metrics; communicate risks, dependencies and recommendations to senior stakeholders.
- Balance business priorities, technical feasibility, compliance/security requirements, delivery timelines and product quality when making decisions.

Blenheim Chalcot
Spend Management / Fintech
Product Manager | AI & Quality Automation

- Partnered with Product, Engineering and business stakeholders on product delivery, quality strategy, automation opportunities and release readiness across spend management journeys.
- Identified repetitive QA documentation and stakeholder reporting as an automation opportunity and built internal AI-powered workflows using Claude and GitHub Copilot.
- Translated testing and engineering signals into structured product insights, including test documentation, defect summaries, QA status and release reporting, improving consistency and reducing manual effort.
- Defined automation and platform roadmaps across Selenium, Playwright, Cypress, Appium, API automation, Jenkins, Docker, Kubernetes, BrowserStack and AWS.

M&G Global Services — **Jun 2019 – Feb 2022**
Sonata, CX, OX, AX
SDET / Automation Tester API

- Reduced an API automation cycle from approximately 30 days to one day through reusable automation and CI/CD integration.
- Built UI, API, database, file and mobile automation using Selenium/Python, Playwright, Cypress, Azure and Docker; improved execution speed by 30%.

TIAA India Pvt. Ltd. — **Sep 2017 – Jun 2019**
Unified Desktop Application
Hybrid QA

- Developed Selenium/Java/Cucumber and Appium frameworks; reusable Postman API automation reduced weekly execution from four hours to one hour.

Citius Tech — **Mar 2017 – Aug 2017**
Navinet Healthcare
Automation Lead

- Led Robot Framework/Python API automation and Selenium automation, increasing test coverage by 40%.

Capgemini India Pvt Ltd. — **Apr 2014 – Feb 2017**
Thomson Reuters
Manual & Automation Tester

- Built Protractor/Selenium/JavaScript web automation and Appium mobile automation with Jenkins CI/CD.

0-TO-1 AI PRODUCT BUILDING

AI-Powered QA Agents: Identified repetitive QA communication and documentation as a product opportunity; designed AI-assisted workflows using Claude and GitHub Copilot that transform testing and engineering inputs into test documentation, defect summaries, status reports and release-ready communication. Applied product problem definition, workflow design, prioritization, stakeholder feedback and outcome-focused iteration.

PRODUCT LEADERSHIP & OPERATING MODEL

- **Product discovery & prioritization:** Translate customer/business needs into requirements, user stories, priorities and roadmap decisions.
- **Cross-functional leadership:** Align business, Product, Engineering, DevOps and QA teams around scope, dependencies, risks and release decisions.
- **Outcome-led lifecycle:** Connect discovery and strategy to delivery, launch and post-release improvement using quality, execution-time and release signals.

EDUCATION, CERTIFICATIONS & SKILLS

Education & Certifications: B.E. Computer Engineering — Mahatma Gandhi Mission's College of Engineering & Technology, University of Mumbai (2013, First Class) | IIT Roorkee — AI in Product Management | IITD — Data Science & Machine Learning | Microsoft Azure Fundamentals

Product, Technical & AI: Product Strategy, Product Discovery, PRDs, Roadmaps, Prioritization, Agile/Scrum, Stakeholder Management, AI Products, AI Agents, GenAI, Prompt Engineering, Claude, GitHub Copilot, ChatGPT, APIs, Microservices, Selenium, Playwright, Cypress, Appium, Rest Assured, Postman, JMeter, k6, Jenkins, Docker, Kubernetes, AWS, Azure, Python, Java, JavaScript, TypeScript, SQL.
